### **Pleasanton Police Department Launches New Resource for Citizens to Track and Research Police Activity**

The Pleasanton Police Department has launched a new online resource called Citizen Connect, which allows citizens to track and research police activity within the City of Pleasanton. Using the Citizen Connect website, the public can easily access information for incidents ranging from robberies to car accidents. Information is updated in real-time once a call is closed. This website replaces the police department's original crime mapping software, which was available to citizens for the past decade. Citizen Connect is a valuable crime mapping tool that offers increased control and customization for business owners, residents, and prospective residents, though some incidents are protected by law and made confidential.

“The Pleasanton Police Department is always looking at emerging technologies that enhance the transparency of our department,” said Captain Kurt Schlehuber, “It is important for us to share the work we are doing to keep our community safe.”

The police department encourages all citizens to access Citizen Connect and appreciates community feedback to improve the overall user experience. Citizen Connect is operated by the Pleasanton Police Department and is not affiliated with the Citizen mobile app.
